To whom it may concern,

I would like to highlight my concern at the proposal of siting the DCC super depot on Marrowbone Lane, Dublin 8. As a resident of the South Inner City I am very concerned about the proposed location of the depot as it would seriously undermine the future of the Liberties area of Dublin. The Liberties area is a unique part of Dublin that has suffered from decades of neglect and a lack of investment especially in relation to green spaces and community facilities. The 4.5 acre site should be set aside for both housing and recreational space as opposed to a super depot. The area offers a unique opportunity to develop a new type of housing within an existing community in the form of an ecovillage or sustainable housing scheme and would bring a new dimension into the inner city. There are many examples of how this type of community can be developed (Vauban, Freiberg is a good example) and would show great leadership and vision from DCC. Finally the inner city needs more green space and it should not function solely as a transport network in and out of the city center, there is a desperate need for more spaces for children to play, for families to grow food and also for trees to clean the air of our heavily polluted streets.

I hope that the short term vision for Marrowbone Lane is halted and that a vibrant and sustainable Liberties Quarter is developed so that future generations of inner city families can benefit.

Regards

Jane Hackett
