Make a submission:

Hello,

I am a UCD graduate from the MSc in Urban Design and Planning. During my last taught semester, I studied the site in question and developed an urban design masterplan for the New St James Gate and the Marrowbone Lane sites. I have included my final image as part of this submission, as a comment and encouragement for more access and people focused development in this site. My design included multi-use development within the Guinness lands, as well as residential, open space, and pedestrians focused transit in the Marrowbone Lane area; while increase connections and movement throughout and to both sites. In addition to this final drawing, I also have movement research diagrams which were developed during site studies.

Please feel free to contact me if you have any questions.
Alanagh Gannon
