This attempt to rezone lands is an utter shame and disgrace. As a primary school we have absolutely no access to open green space. Our children urgently need local sporting facilities to try to combat the inactivity of the modern world. It is difficult for parents to motivate children to be fit and active, this proposal of an green area was the first bit of good news for this area in a long time. This new proposal that it should be used as a super depot is a further insult to the people of Dublin 8. We do not need industrial space in an area of disadvantage, we need progressive thinking and facilities to combat years and years of social isolation. Much good work had been done by the late Graham Jones and Liberty Saints. They have always had the best interest of the young people of Dublin 8 to the fore of their agenda. The decision now to reverse a motion that was passed in September 2015 to rezone the lands to facilitate sports and recreational facilities is shameful and detrimental to the future of the young people of Dublin 8. On behalf of the parents and staff of Scoll Treasa Naofa we would ask that this new proposal be scrapped and the recommendation of September 2015 be honoured.

Kind Regards,

Ann Marie Spillane
